### Storyline:

In a unique half-storage, half-office facility, we took on this project which required us to overlay a fully adhered roof system. Despite the complexity of the site, we were able to maintain our expected efficiency as a result of strategic planning, wrapping up the project in less than 30 days. Throughout our endeavor, we prioritized the seamless continuation of facility operations, ensuring zero interruptions or disruptions which was a top priority for the client. Our dedication to professionalism extended to our work practices, as we completed the project without generating any noise complaints or disturbances.
